Professional Summary

- Software Engineer with **10+ years of experience** in designing and delivering scalable backend systems, microservices, and production-grade enterprise applications.
- Strong expertise in **Java, Scala, Spring Boot, Apache Spark, Kafka, Delta Lake, Kubernetes, and Azure**.
- Proven track record in **performance optimization, distributed data processing, event-driven architecture, and cloud reliability**.

Technical Skills

- **Languages & Backend:** Java, Scala, SQL, Spring Boot, Microservices, REST APIs, Multithreading
- **Messaging & Streaming:** Apache Kafka, Azure Event Hub, ActiveMQ, Event-Driven Architecture
- **Data Engineering:** Apache Spark, Spark SQL, Delta Lake, Parquet, Distributed Data Processing
- **Cloud & DevOps:** Microsoft Azure, Kubernetes, Docker, Azure Functions, Helm, CI/CD (TeamCity), Git
- **Databases & Caching:** Redis, PostgreSQL, Kusto (Azure Data Explorer), Oracle Database
- **Architecture & Concepts:** System Design, Distributed Systems, Performance Tuning, Business Continuity and Disaster Recovery (BCDR), Mentorship

Professional Experience

- **Software Engineer II | Microsoft India** *Feb 2023 – Present*
 - Designed and shipped **Apache Spark-based data pipelines** to build a datastore for Data Explorer using **Azure Audit Logs**, processing **terabytes of enterprise data**.
 - Improved Spark job performance by **60% (50 to 20 minutes)** through optimized partitioning, Spark configuration tuning, and memory leak fixes.
 - Migrated application logs from a legacy datastore to **Azure Data Explorer (Kusto)**, improving reliability and **reducing operational costs by \$300K annually**.
 - Implemented **Business Continuity and Disaster Recovery (BCDR)** support for an **Azure Function** service consuming data from **Azure Event Hub** and pushing data downstream.
 - Enhanced API security by replacing application tokens with **user-based authentication tokens**, improving access control and compliance.
- **Technical Lead | Oracle, Hyderabad** *Jul 2019 – Jan 2023*
 - Developed and maintained CRM integration features (Salesforce, CX Sales), including bulk import/export workflows used by **thousands of enterprise customers**.
 - Led migration of legacy components to **Spring Boot microservices**, improving scalability and long-term maintainability.
 - Built Spring Boot microservices with **TeamCity CI/CD pipelines** and **Helm chart deployments**, enabling automated periodic export of marketing activity data.
 - Optimized Salesforce export workflows using batch splitting and parallel processing, **reducing processing time by 50%**.
 - Provided technical leadership through design reviews, code reviews, and mentoring engineers to ensure high-quality delivery.
 - Worked extensively with Java, REST APIs, microservices, and asynchronous processing using messaging systems such as **ActiveMQ**.
- **Software Engineer | Harman, Gurugram** *Dec 2017 – Jun 2019*
 - Designed and implemented microservices using **Spring Boot** and **Spring Data** for data retrieval and processing.

- Worked with **MongoDB** for persistence and query optimization in service-level integrations.
 - Built a framework for scheduling IoT device commands using **Quartz Scheduler**.
 - Integrated Swagger UI and Quartz Scheduler; improved code quality using **SonarQube**.
- **Software Engineer | Tata Consultancy Services, Chennai** *Jul 2015 – Dec 2017*
 - Developed REST APIs for enterprise CRM applications using Java and Spring MVC.
 - Implemented purging modules for old transaction data using SQL and shell scripting to reduce storage overhead.
 - Built a Customer Order Administration application using Spring MVC.

Academic Qualification

- Bachelor of Technology (Computer Science and Engineering), Uttar Pradesh Technical University
